			Emp	ty Conditions		Search	Save	

Insert a USB Memory Stick to the DVR/NVR first. (max USB memory stick support up to SanDisk 128GB)

- 1. Select the File Management Tab. Select All Files on the Left Panel.
- 2. Select only the Camera you need. More camera selected, more time to search and backup.
- 3. Set the Start Time and End Time.
- 4. Click Search.
- 5. When you have the result displayed. Select the Video or Picture tab first.
- 6. Click Select All to select all the video/pictures, or Single click on each item. Make sure the <u>Check Mark</u> is selected, If you want to Lock the video file, you can select the Lock icon.
- 7. Select Export.

- 8. Select Video & Log, click OK
- 9. Path Settings:

This is the current USB contains (before backup). Just click OK go next.

The default video format (H.265/H.264) is MP4 which is recommended. The AVI video format can only support H.264.

10. After click away, the windows might disappear very quickly. The backup is in progress now. Please check the Backup Status to view the progress.
