#### **DORI**

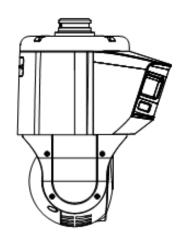

The DORI (detect, observe, recognize, identify) distances give the general idea of the camera's ability to distinguish persons or objects within its field of view. It is calculated based on the camera sensor specifications and the criteria given by EN 62676-4: 2015.

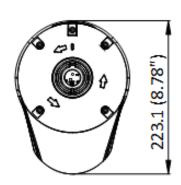

Value	Detect	Observe	Recognize	Identify
Definition	25 px/m	63 px/m	125 px/m	250 px/m
