Recommended IPC Bit Rate: 6MP	2560							
Recommended IPC Bit Rate: 8MP	3072							

## Platinum Series TVI DVR - IP CH / Compatibility Chart

The above diagram outlines how many IP Cameras are supported in conjunction with the corresponding HD-TVI DVR. More IP Channels can be enabled by changing the DVR from Standard Mode to Enhanced mode.

Standard Mode – Allows the use of VCA (Video Content Analysis) Enhanced Mode – VCA is disabled

In addition, by turning off TVI Channels translates to enabling that Channel to be now an IP input.

We have documented the recommended bit rate for various resolutions in the chart above.

## 1. Enabling Enhanced IP Mode -

Platinum						
😚 General	Language	English -	VGA/HDMI Resolution	1024*768/60HZ -
