Installing the web component on a Mac can be disorienting for a Windows user. There are some differences.

Here is an **outline** of the steps to follow:

- 1. Check the Mac/Safari Version
- 2. Download the Plugin Installer for Mac
- 3. Enable "Anywhere" Program Installation
- 4. Run the Plugin Installer
- 5. Disable "Anywhere" Program Installation
- 6. Quit Safari
- 7. Open Safari
- 8. Enter the NVR's IP address
- 9. Login to the NVR
- 10. Allow the Plugin
- 11. Turn on the Cameras

Step 1: Check the Mac/Safari Version

Mac OS X version 10.9.x and up recommended. Safari 6.x and up recommended. Please keep your browser up-to-date for security.

In tests, the web component was used with Mac OS X version 10.7.5 and Safari version 6.1.1 (on a Mac Mini).

Step 2: Download the Plugin Installer for Mac

You can download the plugin directly, or find it at the bottom of the <u>Platinum Download</u> page. It will be called: "<u>Web Component for Mac</u>"

Step 3: Enable "Anywhere" Program Installation

Apple Menu > System Preferences... > Security and Privacy

Click the lock icon to allow changes to the settings.

A password will likely be required.

	Installer is trying to install new software. Type your password to allow this.
	Name: LTS
	Password:
(?)	Cancel Install Software

Then change the settings to allow software from "Anywhere".

Click the lock to prevent further changes.

Step 4: Run the Plugin Installer

Click the **download icon** on the Safari toolbar. **Double click** on the text "**WebComponents.pkg**". This will open the Web Component installer.

Click [Continue] and follow through with the installer. The installer will just tell you where the files will be installed and ask for a password.

Step 5: Disable "Anywhere" Program Installation

Go back to the "Security and Privacy" settings in Step 3 and switch "Anywhere" back to "Mac App Store and identified developers".

Apple Menu > System Preferences... > Security and Privacy

Remember to click the **lock icon** to make changes. A password will be required.

Step 6: Quit Safari

Be sure to quit and reopen Safari. The plugin is only loaded when the program is first run. (Alternatively, reboot the computer.)

Step 7: Open Safari

Be sure to test with Safari. The recent version of Firefox is an overhaul and may have problems.

Step 8: Enter the NVR's IP Address

Step 9: Login to the NVR
