

Due to the increased security of our devices, when adding LTS cameras to 3rd Party NVR's its required to login to the IP Camera and enable ONVIF and setup a username / password accordingly.

- 1. Login to the IP camera via iexplorer (not edge)
- 2. Navigate to Configuration.
- 3. Advanced Settings
- 4. Integration Protocol
- 5. Enable Onvif
- 6. Press "Add"
- 7. Set user name e.g admin
- 8. Set level top administrator
- 9. Set password 8-16 characters ->
 - e.g LTs888\$!

Enabling Onvif & configuring Username / Password
