

Supports up to 500 Apartment Units

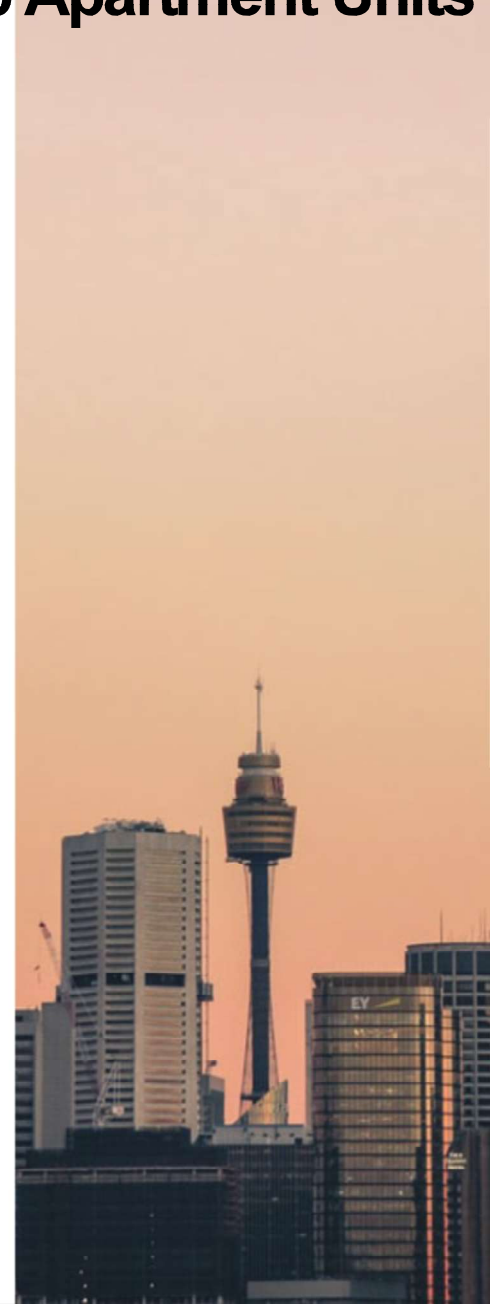

Intercom System Overview

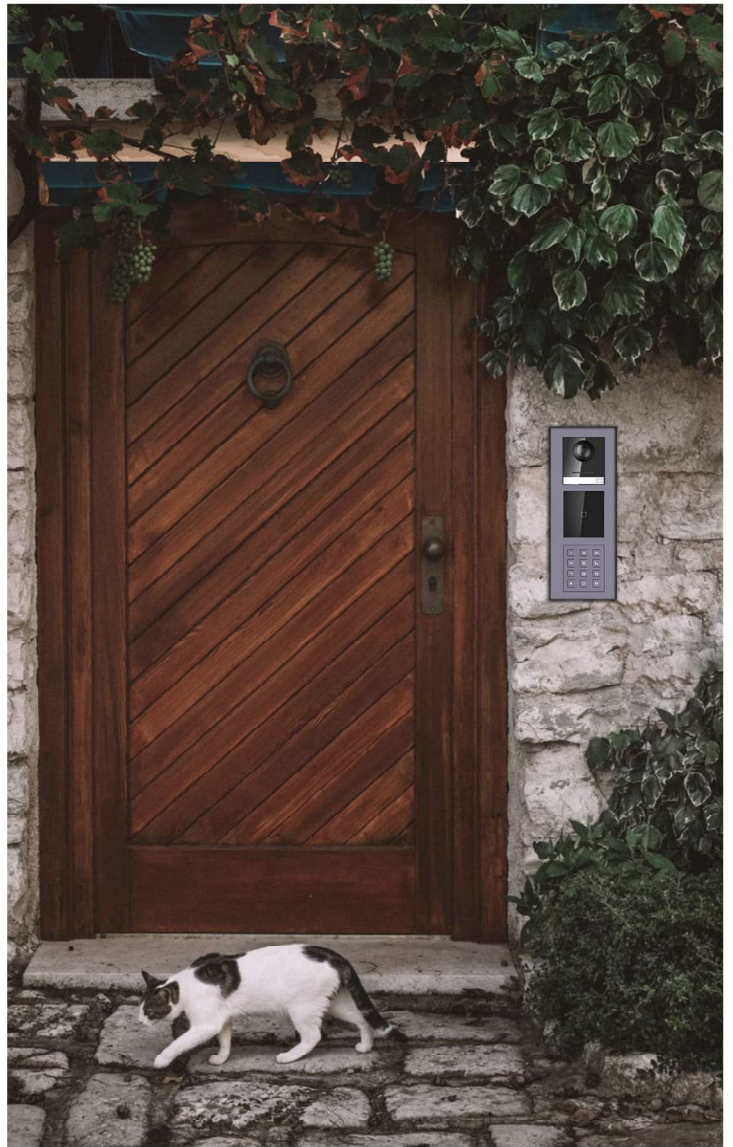

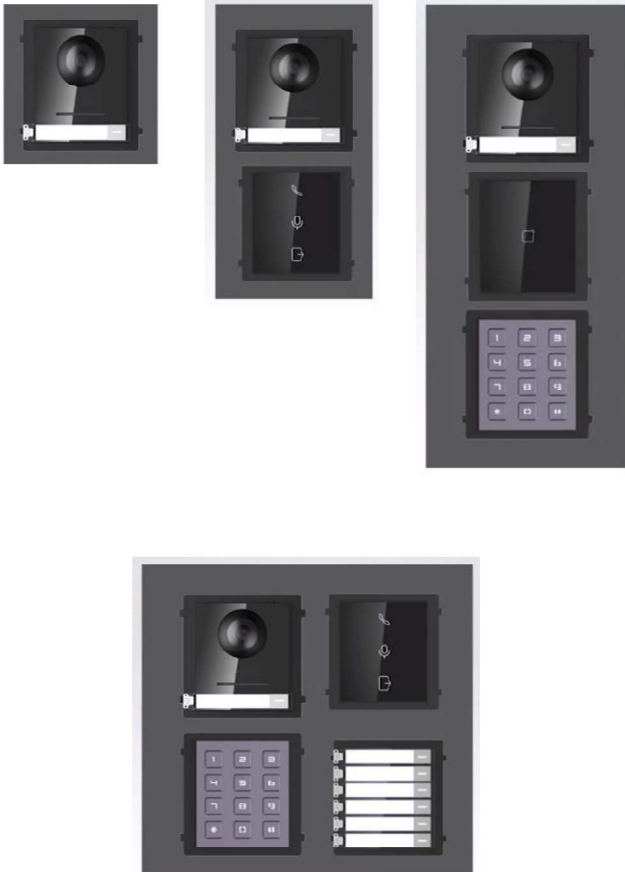

An intercom system is built for communication between visitors and people inside a building. It usually consists of two major components: an outdoor station, and an indoor station.

Besides traditional intercom functionalities, LTS Intercom system supports remote management via phone.

Compatible with LTS NVR / DVR and IP Cameras, LTS intercom devices can be integrated easily and seamlessly into your existing video surveillance system.

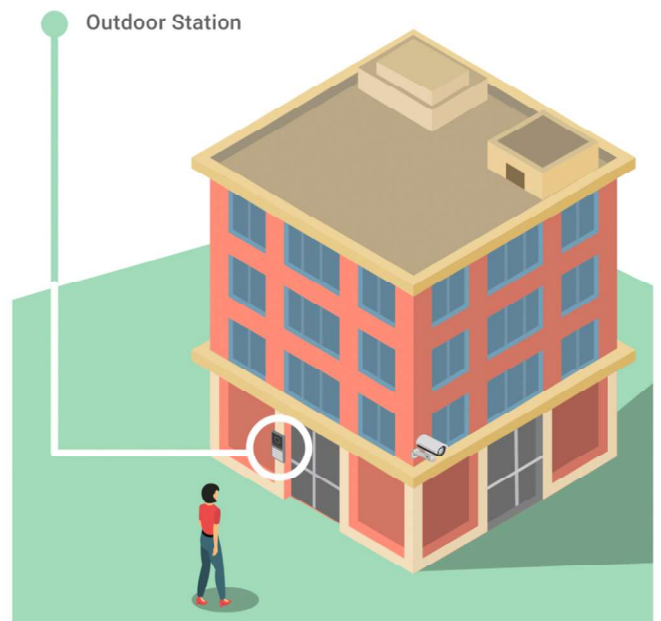

Customisable Modules

Outdoor Station

LTS Intercom Outdoor Station consists of 1 mandatory camera module and optional extension modules like keypad module and card reader module. For each main entrance outdoor station, you can add up to 8 side-entrance outdoor stations.

- 2MP IP Camera
- IR up to 15ft
- Record Videos to LTS NVR / DVR
- Flexible Modules Combination (add up to 8 Sub-modules)
- Built-in Access Control Functionalities
- Automatic Snapshot of All Visitors

Indoor Station

On the 7" screen, you can view and talk with visitors in real time, review missed call history, browse through snapshots taken by outdoor station then stored here.

Each apartment / house should have one mandatory main indoor station, and/or up to 5 extension indoor stations.

All Configurations are done on the main indoor station.

Compatible with LTS video surveillance system, add and view up to 16 IP cameras from the indoor station.

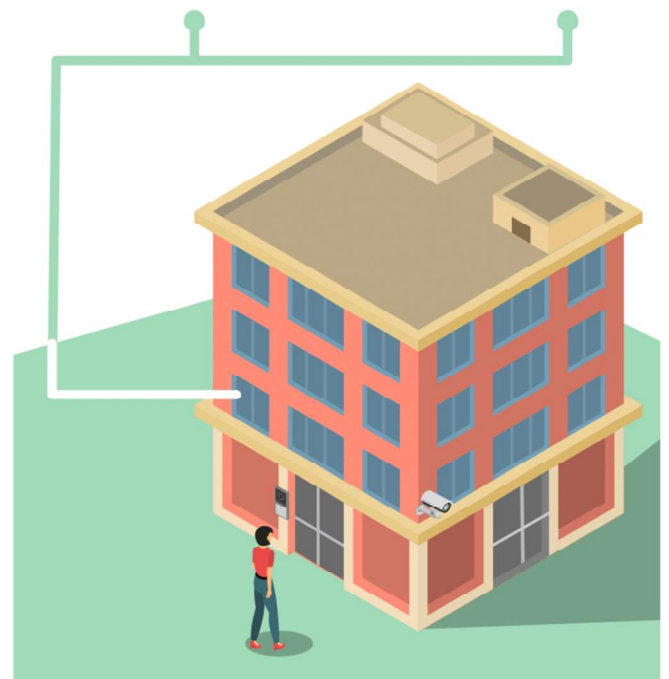

- 7" Capacitive Touch Screen
- Built in Mic and Speaker
- Support 32G SD Card
- Wifi Enabled
- 10/100 Ethernet

Indoor Station

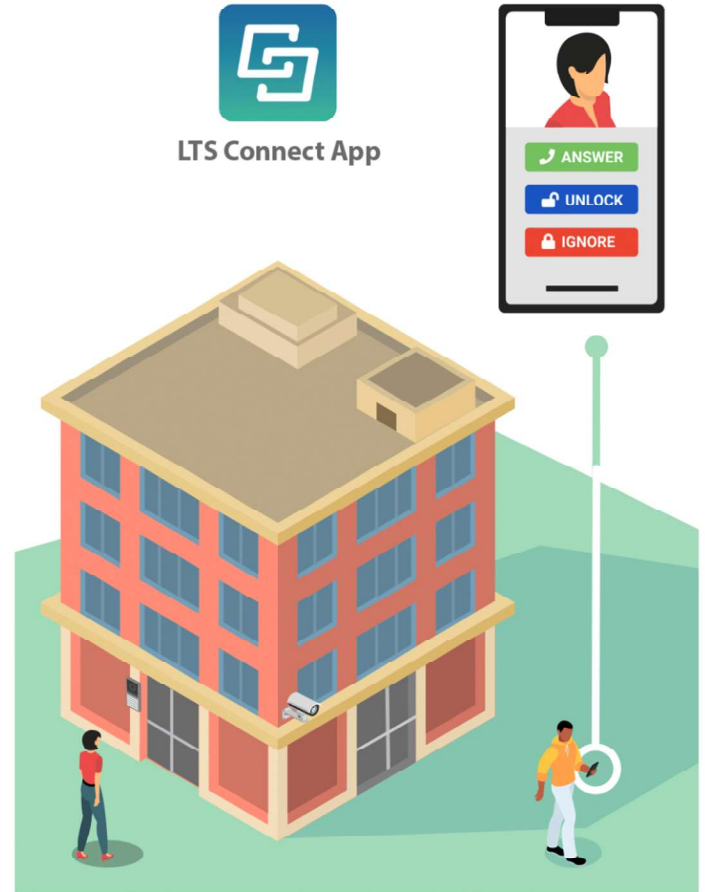

Extension Indoor Station

Mobile App - Remote Management

Using LTS Connect App, you can live view and talk with your visitors on mobile phone when you are not physically in the building, open or lock door remotely. The Call Log keeps the history of all visitors. Using the Indoor Station's touch screen to pair your phone with your indoor station, and start managing your door remotely!

- Open and lock Doors on App
- Liveview Visitors on Phone
- Review Visiting History in Call Log
- Share device access to up to 4 flatmates
